

Project 2 -(Phase 1)

Music App

Introduction

This Document Details The Design Process, Choices, And Rationale Behind The Creation Of A Music App User Interface (UI). The App Is Designed To Provide An Intuitive And Visually Appealing Experience For Users To Enjoy Their Favorite Music Seamlessly.

Design Choices

Typography

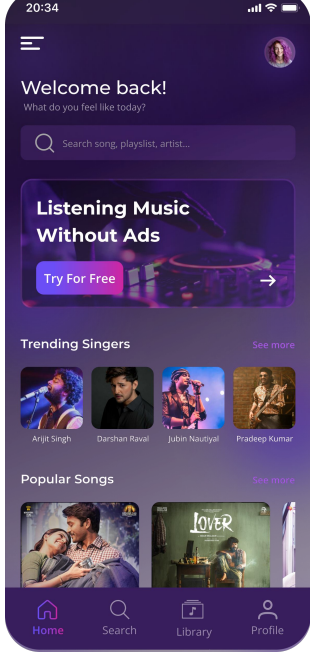

Primary Font: Montserrat
Secondary Font: Open Sans

User Flow And Navigation

Welcome Screen (Screen 1)

Elements: Greeting Message, Search Bar, Promotional Banner, Trending Singers, Popular Songs, Navigation Bar.

Rationale:The Welcome Screen Is Designed To Provide Users With Immediate Access To Popular Content And A Search Functionality. The Promotional Banner Encourages Users To Try The Ad-Free Version, Potentially Increasing Subscription Rates. The Navigation Bar At The Bottom Ensures Easy Access To Different Sections Of The App.

Project 2 -(Phase 1)

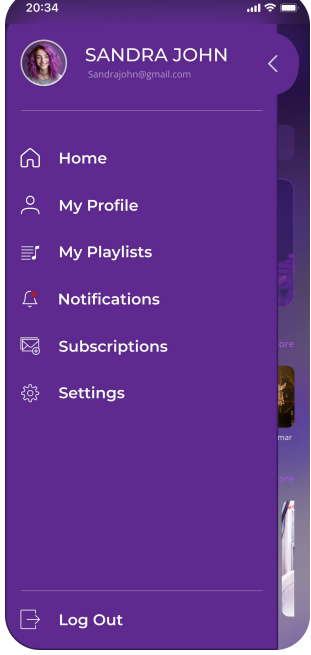

Music App

User Flow And Navigation

Sidebar Menu (Screen 2)

Elements: User Profile, Navigation Links (Home, My Profile, My Playlists, Notifications, Subscriptions, Settings), Logout Button.

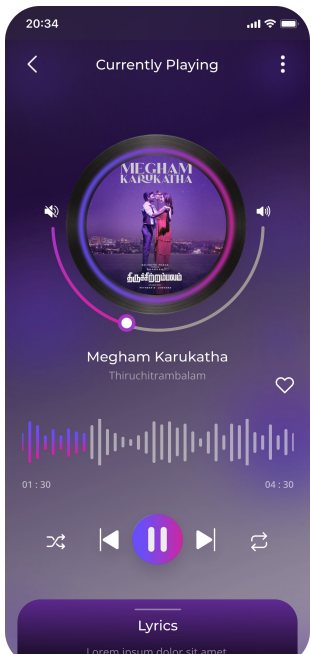

Rationale: The Sidebar Menu Provides A Comprehensive List Of Navigational Options, Ensuring Users Can Easily Access Different Parts Of The App. The User Profile At The Top Enhances Personalization, Making Users Feel More Connected To The App.

Currently Playing (Screen 3)

Elements: Song Information, Playback Controls, Volume Control, Heart Icon For Liking, Lyrics Section.

Rationale: The Currently Playing Screen Focuses On Providing A Rich Media Experience. The Prominent Display Of Song Information And Album Art Enhances User Engagement. Playback Controls Are Intuitively Placed For Ease Of Use, And The Lyrics Section (With A Placeholder Text) Adds An Additional Layer Of Interaction For Users Who Enjoy Singing Along.

Project 2 -(Phase 1)

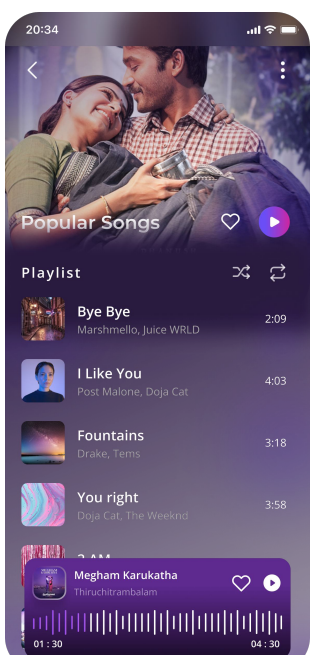

Music App

User Flow And Navigation

Playlist (Screen 4)

Elements: Playlist Image And Name, List Of Songs With Duration, Currently Playing Song Highlighted, Playback Controls.

Rationale: The Playlist Screen Is Designed For Easy Browsing And Interaction With Songs. The Currently Playing Song Is Highlighted To Provide Context, And The Playback Controls Are Consistently Placed For A Seamless User Experience.
